Summary

Full-Stack Developer with **3+ years** of experience building scalable, high-performance web applications using the **MERN stack**, **TypeScript**, and modern backend frameworks. Specialized in integrating AI models, developing robust APIs, and implementing secure payment systems. Adept at collaborating in Agile teams, optimizing application performance, and delivering reliable, user-centric solutions.

Work Experience

LENNY.AI, Israel

May 2023 - Present

Software Engineer (Full Stack) – Remote

- Developed end to end scalable front-end for [BERTI.AI](#) using React.js, Ant Design, and Redux, significantly enhancing user experience and performance.
- Integrated advanced AI models (**ChatGPT**, **Claude**, **Deepseek**, **Gemini**) into [BERTI.AI](#), powering conversational features and increasing overall user engagement.
- Engineered a high-performance custom chatbot for [LENNY.AI](#), streamlining user registration, authentication, and scholarship application processes, resulting in a **30% increase in conversion rates**.
- Integrated **PayPal** and **Paddle** payment gateways, streamlining the checkout process and increasing transaction success rates.
- Designed and implemented scalable RESTful APIs with **NestJS**, **PostgreSQL**, and **MongoDB**, improving backend efficiency and system scalability. Defined clear API contracts and data schemas to ensure consistency and reliable integration.
- Developed interactive dashboards and dynamic UI components using Ant Design, enhancing usability and performance, with comprehensive unit testing implemented using Jest.

Welkin Ring Digital Solutions, Faridabad

Apr 2022 - Apr 2023

Javascript Developer (MERN)

- Built secure and scalable backend systems using Node.js, Express, and MySQL, delivering high-performance APIs.
- Developed web applications with integrated HDFC payment gateway, ensuring smooth transactions and accurate data handling.
- Migrated legacy PHP systems to **Node.js**, improving scalability and maintainability.
- Optimized database performance through query optimization and indexing in MySQL, reducing load times by **30%**.

Skills

Languages: JavaScript, TypeScript, C/C++, HTML/CSS, PHP

Frameworks & Libraries: React.js, Next.js, Redux, Tailwind CSS, Ant Design, Shadcn UI

Backend & APIs: Node.js, Express.js, NestJS, RESTful APIs

Databases & ORM: MongoDB, PostgreSQL, MySQL, Mongoose, Sequelize

DevOps & Tools: Git, Docker, RabbitMQ, Redis, Firebase, Postman, VS Code

Authentication: JWT, OAuth, Clerk.js, Arcjet

Education

Gurugram University

Sep 2023– May 2025

Masters of Computer Applications

Maharshi Dayanand University, Rohtak

Aug 2019 - Jun 2022

Bachelors of Computer Applications

Project Work

Job Portal - Next.js, Clerk.js, MongoDB ([Live Link](#))

- Developed a full-featured job portal with secure authentication using Clerk.js.
- Implemented candidate profile management, job applications, and recruiter dashboards.
- Enhanced platform interaction through a social feed and streamlined application process.

Blog App - Medium Clone - Next.js, Arcjet, MongoDB ([Live Link](#))

- Built a robust blogging platform with rich-text editing via **React Quill**.
- Integrated **Arcjet** for seamless authentication and **PayPal** for premium memberships.
- Enabled reliable image uploads with cloudinary and added an interactive commenting system.
